

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1. (Original) A device comprising:

a first conductive film wiring disposed on a wiring pattern area on a plate by liquid drop discharge; and

a second conductive film formed outside the wiring pattern area on the plate by the liquid drop discharge so as to be electrically separated from the first conductive film.
2. (Currently Amended) A device according to Claim 1, wherein the second conductive film is formed of ~~the same~~ a material that is the same as a material of as the first conductive film.
3. (Cancelled)
4. (Currently Amended) A device according to Claim 1, wherein the an end of the second conductive film comprises a connecting terminal.
5. (Original) A device according to Claim 1, wherein the plate is provided with a hydrophobic portion provided with a hydrophobic property and a hydrophilic portion provided with a hydrophilic property, and the first conductive film and the second

conductive film are formed by discharging the liquid drops toward the hydrophilic portion.

6. (Original) A device according to Claim 1, wherein the liquid drops contain metallic fine particles.

7. (Original) An electro-optic device comprising the device according to Claim 1.

8. (Original) Electronic equipment comprising the electro-optic device according to Claim 7.

9. (Cancelled)

10. (New) A device comprising:
a plate;
a single molecular layer of fluoroalkyl silane on the plate;
a liquid drop discharged first conductive film wiring disposed in a wiring pattern area on the single molecular layer; and
a dummy wiring film formed outside the wiring pattern area on the single molecular layer, the dummy wiring film electrically separated from the first conductive film.

11. (New) A device according to Claim 10, wherein the first conductive film and the dummy wiring film are formed of the same material.

12. (New) A device according to Claim 10, wherein an end of the dummy wiring comprises a connecting terminal.

13. (New) A device according to Claim 10, wherein the liquid drop discharged first conductive film contains metallic fine particles.

14. (New) An electro-optic device comprising the device according to Claim 10.

15. (New) Electronic equipment comprising the electro-optic device according to Claim 14.
